

Texas Balance of State Continuum of Care

MODERNIZATION

What

What is modernization?

The CoC is exploring options to better support of local communities, improve outcomes for people experiencing homelessness, and amplify work done at the local level.

Over the past four years the CoC has had many conversations about how to add capacity to local areas within the BoS.

Why

Why is this important?

The TX BoS CoC is dedicated to prioritizing the needs of individuals experiencing homelessness and those who work most closely with them. The vast number of communities and extensive area within the Texas BoS present challenges that are not met by existing CoC structures and processes.

Who

Who is involved in modernization?

Everyone! The CoC would like to gather input from all funded entities, partners, and people with lived experience to shape the future of the TX BoS CoC.

Join us at a future meeting, or complete the **input form** to give us your thoughts about what your community needs!

When

What is the timeline for this process?

The CoC, alongside Cloudburst, is starting to have discussions with various entities across the BoS to gather input. Cloudburst will analyze alternatives for the CoC to add capacity, including staffing options, funding options, and geographic options. A summary of the discussions and analysis will be presented at the CoC General Membership meeting on September 11, 2024. Discussions will continue through at least the end of 2025.

Questions

Who can we contact if we have questions?

Jim Ward
